Some areas have banned or regulated its use due to concerns about its potential health effects and its social implications.</p> <p>Deeply concerned that, consumption of Miraa has contributed to social ills in the local population including breakup of families, reduced productivity, draining of family income, school dropout and drop in academic performance in schools.</p> <p>Noting that, many of the studies done and the observed includes family instability because of draining on family resources and the lack of care and attention on the part of the chewer for his family members, reduced work productivity as a result of absentee tardiness and the generally depressed mood of the khat chewer. The preoccupation with the attainment and use of khat, and the neglect of all other community activities is evident to a large extent possible.</p>
